

3 DAY FLY-IN SAFARI

SERENGETI NATIONAL PARK

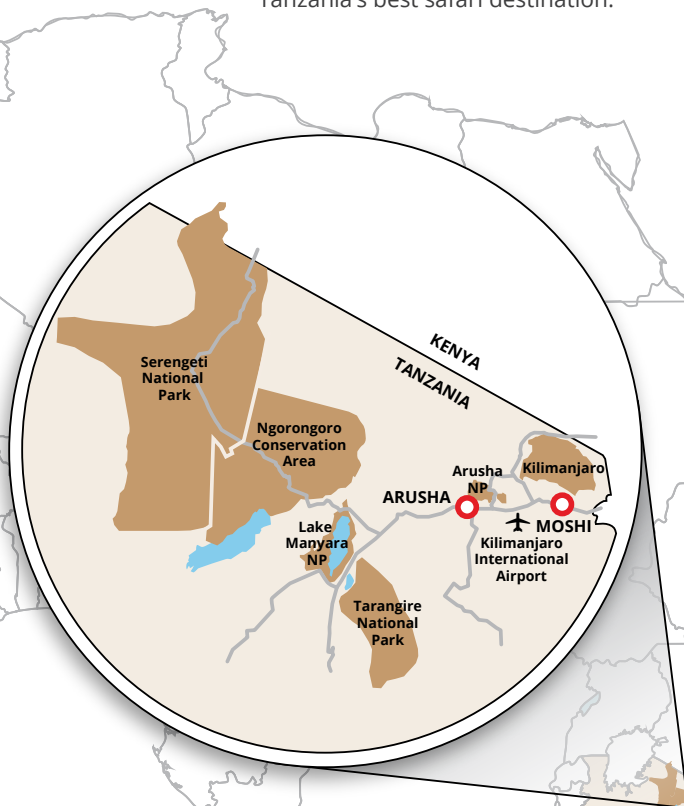

If you want to see the Serengeti but do not have the time to drive there, our three day fly-in safari is for you. A charter flight from Arusha will put us into the heart of Serengeti National Park—the most famous wildlife park in the world. From there, our expert guide will take you in search of predators and prey in our well-maintained Land Cruiser with a roof hatch for unobstructed game-viewing. This trip is a great way to maximize your experience in Tanzania's best safari destination.

DAY 1 We depart from your lodge, and proceed to the Arusha airport, and fly into **Serengeti National Park**. We embark on our game drive in the expansive landscape. The word 'Serengeti' means 'endless plains', which describes the park's 5,600 square mile boundary. Yet for its sprawling area, the park does not disappoint when it comes to rich game-viewing. The ecosystem is one of the oldest on earth. It boasts one of the most varied collection of wildlife on the planet. Annually, from May to December, millions of animals migrate from central Serengeti to Kenya's Masai Mara and back again in an incredible spectacle. Even during the 'down-time', vast herds of wildebeest, zebra and gazelle roam here, along with groups of elephant, giraffe, and buffalo, as the lions, leopard, cheetah, hyenas and jackals stalk their meals. At sundown, we make our way to your lodge for dinner and overnight.

DAY 2 We continue our game drive through the Serengeti searching for hippos and crocodiles in the watering holes. We drive for miles making sure you see everything this place has to offer. As the sun sets, we return to your lodge for dinner and rest for the night.

DAY 3 After breakfast, we continue our game drive through the Serengeti. In the afternoon, we fly back to Arusha. With prior arrangement*, we can drop you off at Kilimanjaro International Airport (JRO) or book additional lodging.

* Clients can make flights departing after 7:00 pm from Kilimanjaro International Airport (JRO)
